Summary

Determined Full-Stack Developer with a demonstrated history of working independently and achieving substantial growth in a short timeframe. Proven ability to leverage strong technical knowledge and personal resilience to overcome challenges and drive results.

Skills

- **Programming Languages:** JavaScript (Node.js, Angular), Python
- **Web Technologies:** HTML5, CSS3, Bootstrap
- **DevOps:** CI/CD, Docker, Automated Deployment
- **Tools:** GitHub, Vercel, Checkly
- **Operating Systems:** Linux, Windows

Experience

Self-taught Full Stack Developer

Independent Projects, Douglasville, GA (June 2022 - Present)

- Successfully completed Antisyphon's Mitre ATT&CK Course in just 4 days.
- Maintained a GitHub contribution rating of A+, demonstrating consistent engagement and active learning.
- Managed CI/CD Monorepo for Angular projects, handling Vercel deployments and continuous testing with Checkly.
- Developed Python applications for a "no-effort" passive income solution, automating the use of OpenAI's artificial intelligence.
- Achieved full-stack deployment of web applications in minutes, effectively tailoring functionality as required.
- Developed and maintained a Homelab utilizing Docker and hand-writing docker-compose files as needed.

Personal Projects

- **Automated AI Repository Management:** Leveraged automation to manage dependencies in an AI repository, contributing to a more efficient and reliable codebase.
- **Web Application Penetration Testing:** Completed an intensive, 4-day course on web app penetration testing, furthering understanding of security best practices and potential vulnerabilities.

Education

Self-educated in programming and IT concepts, spending 10-12 hours a day mastering various programming languages and IT concepts. Despite not having formal college education due to life's hurdles, managed to make significant strides in just six months, a testament to the drive and resilience.
